

Motorbazee Automation Script

Make an Automation Script Which can Extract Vehicles Data from Motorbazee website in following manner.

Note - All the Process Should be done by your automation bot only

- First Visit the Website (motorbazee.com)
- Go To the Used Truck Section
- Select any State and City or you can leave it
- Select User Selected Or User Inserted Vehicle Company
- Select User Selected or User Inserted Vehicle Model
- Then Click On Go button
- Just Extract All The data of Every Vehicle that is present over the page
- Save That Data in the form of csv

Note - (Try to use classes , Functions, etc.)
